

MENBO Experts Meeting

12th May 2010

STRATEAU

The strategic analysis tool and script of
balances requests/water resources

Mrs. Jeannette PRETOT
President of Water Embassy
France

Introduction

- Most Mediterranean countries will face the optimum of available water.
- So water demand and supply become decisive for the territories and for the peace in the Mediterranean.
- Four countries (France, Italy, Lebanon, and Morocco) have worked to complete a prospective modeling tool concerning the use of present and future water which permits to define the efficient use of water.

Objectives of the tool SRATEAU

- Allow for the different deciders (states, regional and local authorities, organisms of basins and under sub basins, etc.) to estimate the best possible demands of water and the available of water resources.
- Allow the local and national actors to integrate the restraint on water in the strategic planning.

- 
-
- Allow to have common tool for the water strategy for the Mediterranean Union
 - Allow the engineering students of the Mediterranean Basin to work together in order to collect data, to raise awareness and to make the model more effective.

The six **PROJECTS** of The Mediterranean
Union For Young Water Ambassadors
(UMJAE)

- 1- Struggle against rural migration: Deir El Ahmar in Lebanon
- 2- Valorization of oily water : Sfax in Tunisia
- 3- Sanitation of rural zone: Casablanca in Morocco
- 4- Diagnostic rejections of Mediterranean: Gaza

5- Education of the population for sanitation
improvement: Gaza

6- **STRATEAU**: Water Embassy, France, Lebanon,
Morocco, Italy, and eventually all the Mediterranean
countries

Water Embassy

- In 2008, the WE has created the Mediterranean Union of Young Water Ambassadors (UMJAE).
- Roles:
 - Awareness, education, information, completion.
 - Organizing water classes for the students

MENBO Experts Meeting

Thank you!
